

### **ABSTRACT OF THE DISCLOSURE**

The invention formula substituted 3-alkyl and 3-arylalkyl 1H indol-1-yl acetic acid derivatives which are useful as inhibitors of plasminogen activator inhibitor (PAI-1) useful for treating fibrinolytic disorders, the compounds having the structure

wherein:

10 R<sub>1</sub>, R<sub>2</sub>, R<sub>3</sub>, R<sub>4</sub>, R<sub>5</sub>, R<sub>6</sub>, and R<sub>7</sub> are as defined herein or a pharmaceutically acceptable salt or ester form thereof.
